

01

Fig. 2

This diagram shows an exploded perspective view of a container assembly. The main container body (10) is shown with its lid (14) and a base (16). The lid (14) has a top surface (34) and a side wall (44). The base (16) has a bottom surface (46) and a side wall (48). A central divider (50) is shown between the lid and the base. A handle (22) is shown attached to the side wall (48) of the base. A latch (28) is shown on the side wall (48) of the lid. A locking mechanism (20) is shown on the side wall (48) of the base. The locking mechanism (20) includes a locking pin (2002) and a locking sleeve (2004). The locking pin (2002) is shown in a retracted position, allowing the lid (14) to be opened. The locking sleeve (2004) is shown in an extended position, preventing the lid (14) from being opened. The locking pin (2002) is shown with a locking pin head (2006) and a locking pin tail (2008). The locking sleeve (2004) is shown with a locking sleeve head (2010) and a locking sleeve tail (2012). The locking pin (2002) is shown with a locking pin head (2006) and a locking pin tail (2008). The locking sleeve (2004) is shown with a locking sleeve head (2010) and a locking sleeve tail (2012).
